

More Parks Less Roads

**Build a city park instead of the
900 N cemetery bypass road**

Heber City is planning a bypass road from highway 40 looping around to center street. Let's take this opportunity and build a park instead of a road. The city has the land lets work with Red Ledges and make this part of our city better for future generations.

Our community would be better served by more access to trails and open space.

Paving over more of our valley so people can shave off a minute or two of travel time isn't worth it.
